ENDURANCE 10 & 12

A pelleted feed for mature horses and ponies at all activity levels

Endurance 10 and Endurance 12 are multipurpose pelleted formulas designed to meet the nutritional needs of mature horses and ponies in all levels of activities. The feeds are fully fortified with vitamins and minerals not typically found in native Southeast forages. Optimal levels of these nutrients are imperative for top-notch health and performance.

During the pelleting process, cereal grains are ground finely and then heat-treated. These processing techniques increase the digestibility of the grains, allowing the nutrients to be readily absorbed from the gastrointestinal tract.

Unlike conventional textured feeds, Endurance 10 and Endurance 12 contain little molasses which helps maintain a quieter, and therefore more trainable, horse.

Endurance 10 contains 10% protein, and Endurance 12 contains 12% protein. Varying protein content allows horsemen to choose the appropriate feed for the type of forage being fed. Horses being fed grass hays may be fed Endurance 12, and horses consuming high-protein legume hays such as alfalfa or clover may be given Endurance 10.

FEEDING DIRECTIONS

Weight of Horse (lbs)	900	1000	1200
Level of Performance	Amount of Feed Per Day (lbs)		
Light Work*	5	5.5	6
Medium Work**	5.5	6	7
Heavy Work***	7	8	9

*Light Work Western and English pleasure, trail horses, equitation, etc.
 **Medium Work Ranch work, cutting, roping, barrel racing, jumping, dressage, etc.
 ***Heavy Work Intense race training, polo, three-day eventing, Western performance horses, etc.

All Banks Mill horse feeds should be fed with liberal quantities of high-quality hay and/or pasture plus free-choice salt and water.

**DO NOT FEED MORE THAN 5 LBS
 IN A SINGLE FEEDING**
