in the ZONE

A protein, mineral and vitamin supplement for horses

in the Zone is a Grain Balancer Pellet that is designed for foals, weanlings, yearlings, pregnant mares, lactating mares, breeding stallions and performance horses. **in the Zone** can be fed alone as a low calorie source of essential protein, vitamins and minerals which are often marginal in all-forage diets. **in the Zone** can also be mixed with unfortified grains to form “balanced” grain concentrates for any class of horses requiring additional calories to grow or perform. In both cases, **in the Zone** should always be fed with a minimum of 1% of body weight per day of good quality forage (hay/pasture), plus free choice salt and water.

FEEDING DIRECTIONS

| Type of Horse | in the ZONE Intake |
|------------------------------------|--------------------|
| Foals 3-5 months | 1 lb |
| Weanlings | 2 lb |
| Yearlings | 2 lb |
| Pregnant Mares First 8 months | 1 lb |
| Last 3 months | 2lb |
| Lactating Mares First 3 months | 2 lb |
| Second 3 months | 1.5 lb |
| Breeding Stallions | 1.5 lb |
| Performance Horses Light training* | 1.5 lb |
| Moderate training** | 2 lb |
| Intense Training | 2 lb |

** Medium Work Ranch work, cutting, roping, barrel racing, jumping, dressage, etc.

*** Heavy Work Intense race training, polo, three-day eventing, Western performance horses, etc.
